

DenialShield

Client Case Studies

Different EMRs. Different specialties. The same denial curve — **bent**.

Two live DenialShield deployments. Denials flagged and fixed **before claims leave the door** — pre-bill, not appeals.

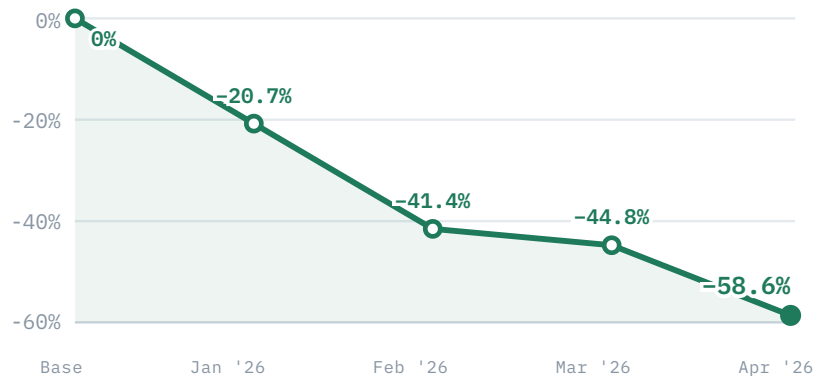

CASE STUDY 01

EMR · eClinicalWorks

Multi-Site MSK Group

-58.6%

Indexed denial-rate reduction vs. baseline

- **Deepening month over month.** -20.7% → -58.6% across the period.
- **Pre-bill, not appeals.** Flagged and fixed before submission.

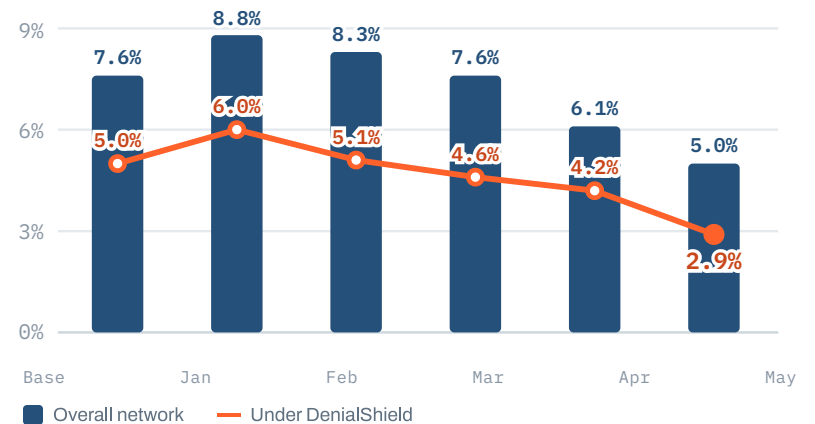

CASE STUDY 02

EMR · athenahealth

Multi-Site Cardiology Group

5.0% → 2.9%

Denial rate at pilot sites — **~42% below baseline**

- **Nearly half the network rate.** Pilot sites denied at 2.9% (May) vs. 5.0% overall.
- **Consistently below the curve.** Baseline = CY 2025 avg; data as of Jul 1, 2026.
